PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience building responsive web applications and automation tools using Python, Flask, Django, Django REST Framework, JavaScript, React.js, HTML5, CSS3, Bootstrap, SQL, and MySQL. Experienced in developing CRUD applications, integrating REST APIs, building database-driven booking systems, and implementing responsive user interfaces. Familiar with Git/GitHub, Postman, API testing, debugging, and problem solving.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frontend: HTML5, CSS3, Bootstrap, React.js, Responsive Web Design

Backend: Django, Django REST Framework, Flask, REST APIs, CRUD, API Integration

Database: PostgreSQL, MySQL, SQL

Tools: Git, GitHub, Postman, VS Code, API Testing

Core Concepts: Object-Oriented Programming, MVC/MVT Architecture, Authentication, Validation, Debugging, Version Control

PROJECTS

Automated Examination Scheduler

[GitHub](#) | [Live Demo](#)

- Built a Flask-based examination management system to automate exam scheduling, hall allocation, faculty invigilation assignment, and student seating arrangements.
- Processed student, subject, staff, and room data from Excel datasets using Pandas and OpenPyXL to generate structured examination outputs.
- Implemented downloadable PDF report generation and a responsive web interface for streamlined exam management workflows.

Tech Stack: Python, Flask, Pandas, OpenPyXL, Excel, ReportLab, HTML5, CSS3, Bootstrap 5

Employee Management System

[GitHub](#) | [Live Demo](#)

- Built a responsive React-based Employee Management System with complete CRUD operations for adding, viewing, editing, and deleting employee records.
- Implemented search, filtering, sorting, pagination, and dashboard statistics to improve employee data management and usability.
- Used LocalStorage for browser-side persistence and Bootstrap for responsive UI development and consistent component styling.

Tech Stack: React.js, JavaScript, Bootstrap, HTML5, CSS3, LocalStorage

CineBook Movie Ticket Booking Platform

[GitHub](#) | [Live Demo](#)

- Built a full-stack Django MVT movie ticket booking platform with movie browsing, show selection, authentication, dynamic seat selection, booking, and profile features.
- Implemented PostgreSQL-backed booking with server-side seat validation, double-booking protection, cancellation, simulated payments, and e-ticket confirmation.
- Added Django admin, seed data, automated tests, and a responsive interface; deployed the application on Render.

Tech Stack: Python, Django, PostgreSQL, HTML5, CSS3, JavaScript, Django Templates

CERTIFICATION

Full Stack Python — Code99 IT Academy | 4 Months | Issued 11 Sep 2026 |
